(Utokyu Ikki's Night Talk "Let it break words. Today's "crisis management ability")

Managers under the Corona are required "crisis management ability".

But using such a too much "gorgeous" and high-class words makes me feel unfamiliar rather than well-understanding.

In simple terms, what does that mean?

by

"I don't know what will happen in the world"

"Tomorrow may not be the same as today"

"One inch ahead is darkness"

Such a sense above of constant keeping freshly. Even if there are differences for it in levels, I think anyone can get it by polishing. It does not mean "ability".
