(utokyu blog "Stop spinning wheel in your mind")

Energy, strength, the fate of time.

When these three become overloaded luck opens. However, in light of this "equation of success", in the present case there are only "force", "physical strength" and "fate of time". If the latter two do not exist, what happens when you consider the endless marathon of skills, fists, and a circular rotating basket of fists, it makes you anxious. I think you can imagine.

Therefore, in order to restore the above destiny must need to Maintaining "spirit"

To restore "physical strength"

Wait for "Destiny Time" to arrive,

In short, "don't lose hope, take a good rest. The sprouts sprout, don't hesitate to call you and wait slowly."

In other words

While holding "patience" and "spice", "hold" without waiting for "the destiny of time", have "time", and dare to "move" to the other side. That is "patience"

Or "time patience".

As I said, patience and patience are great for minimizing "civil rights" like slaves and "lack of hope", which is very different from "the future." Or hold on to "luck". Apparently the "management strategy" is to avoid "disappointment" even in the catastrophes of Corona.
