(Uto-Q blog " under the Corona, the way of getting deep sleep on my style")

While others having a trump card of "game over", we will fall into anxiety.

Now under the Corona, workers should be forced to wait patiently for the answer "Am I fired or not?" "the timing is which?"

Until the answer coming, they should stay silently because of depending on the circumstances of the business to which they belong.

Sadly, it is the opponent who holds the treasure sword of the slaughter and deprivation ancestor, and you do not have it.

Similarly, in the case of downsizing or leaving away from current business field, which timing we should set?"

This occasion also depends on grasping market trends,

You have no such a trump card of "game over"

However, if both of 2 are self-employed, and if you want to realize this and "can be achieved" with your own "will" more than market trends, you can decide whether or not to leaving away from the market.

Going through even if you lose it or judging that it was not worth it, both cards you hold in your own hands inside. Staying or leaving away, depending on you, if you accept the coming result after your decision.

If you hold the final cards in your own hands inside, even if they are so tiny level ones, unexpectedly you can get a deep sleeping time although under such a Corona situation, without anxiety and irritation, every night. It seems.

Surely from my point of view, in other words, from brainless happy type character.
