

2022/6/13

13th June 2022

Utokyu`s Easily understandable & speakable Japanese language lesson18 書庫版

(木=kihen`s kanji samples)

On the former article, we showed the guidance and outline of Kanji 7 fields.

Yesterday, in the 1st field, “亻”(=ninben=hito-hen=relevant to human)

Today, in the same 1st field, next item “木”(=kihen=relevant to tree or wood)

1.The shape of “木” is horizontal line shows land and under the line roots and more further above the line tree itself.

Ex)●柱 (hashira=to column, post, pillar) right part of this kanji”主”means “main”.

Then this kanji`s message is “main woods for keeping construction of house”.

●村 (mura=to village)right part of this kanji”寸” means “unit of length=short length=nearby residents”.

●板(ita=board) right part of this kanji”反”means “unit of thin material, for example fabric. Then thin wooden material”

●枯れる=(kareru=get dried)right part of this kanji”古”means “old or get aged”. Then to fall into aged condition, the same.

●様=(sama=calling way for Sir, Madam with respects) right part of this kanji”羊+求) means requiring sheep(=asset, fortune symbol).Then this is calling way for upper status, and the end of person`s name, we attach this “様”

木(kihen)kanji, many, many others we have. But it`s too much enough overworks for you, I guess.

Then today`s lecture I`ll stop here.

On the next lecture, will show you "𠄎"(tehen=relevant to hand)

Thank you.
